Objective

Final-year Computer Science student with hands-on experience in building AI-powered applications, AI agents, and intelligent automation solutions using Python, FastAPI, LangGraph, and n8n. Strong interest in Artificial Intelligence, Machine Learning, and backend development, with a passion for solving real-world problems through scalable and innovative software solutions. Eager to contribute, learn, and grow in a collaborative engineering environment.

Technical Skills

Languages: Python

AI/ML: LangGraph, OpenCLIP, FAISS, Prompt Engineering

Fullstack: React.js, HTML, CSS, JavaScript, FastAPI, SQL, PostgreSQL, MongoDB, Supabase

Cloud & Tools: Git, GitHub, Docker, Postman, AWS (Lightsail, Cognito, Amplify, DynamoDB, Lambda, Amazon S3), Google Cloud APIs

Education

B.E. Computer Science and Engineering

2023 – 2027

Knowledge Institute of Technology, Salem

CGPA: 7.7 / 10

Projects

AI-Based Image Similarity Detection & Web Scraping System

GitHub

- Built an AI-powered image similarity system using **OpenCLIP, FAISS, FastAPI, and Python** to perform semantic image search and efficiently compare large-scale image datasets.
- Learned **multimodal embeddings, vector databases, similarity search, web scraping, image pre-processing, API development, and scalable AI pipeline design** while implementing high-performance image retrieval workflows.

LLM-Powered HR Resume Screening Automation

GitHub

- Developed an end-to-end recruitment automation system using **n8n, OpenAI, Gemini, Gmail, Google Drive, Google Sheets, and REST APIs** to parse resumes, evaluate candidates, and automate the hiring workflow.
- Gained hands-on experience in **workflow automation, AI agent orchestration, API integration, prompt engineering, structured data processing, and no-code/low-code automation** for real-world business applications.

DeepAgent LangChain – Cognitive Scaffolding for Advanced Reasoning

GitHub

- Built a high-integrity AI agent system using **Groq Llama 3.3, LangChain, and deepagents** to support structured multi-step reasoning.
- Integrated **Tavily Search** for real-time validation, enabling the agent to verify claims, cross-check assumptions, and reduce hallucinations.
- Designed a strict output framework covering query understanding, assumptions, evidence, edge cases, and confidence levels for more reliable responses.

Certifications

• **Claude Code in Action** – Anthropic

Certificate

• **Master n8n AI Agents: Build & Sell AI Agents and Automations** – Udemy

Achievements

- Serving as **President, Rotaract Club of Salem Midtown** (2026–2027), leading community service initiatives, managing club operations, and fostering leadership, teamwork, and organizational excellence.
- Served as **Google Student Ambassador** and **Secretary, Rotaract Club of Knowledge Institute of Technology** (2025–2026), organizing technical events, workshops, and community engagement initiatives.
- Contributed as an **Open Source Contributor** in ECSOC, earning **580+ contribution points** and successfully submitting **13 pull requests** across collaborative open-source projects.
- Secured **3rd Place** at the **Alliance One Code Sangram National Hackathon** (36 hours), winning a cash prize of **INR 30,000**.

Publications

A Flexible Multi-Task Structure Contextual Modality Attention-Based Emotion Recognition

Presented at the **3rd International Conference on Sustainable Computing and Data Communication Systems (ICSCDS-2025)**
